EDUCATION

Nanyang Technological University, Singapore

Aug 2024 – Jun 2028

Bachelor of Information and Media Engineering

Google UX Design Professional Certificate, Coursera

PROJECTS

Practice Companion — Web App for Beginner Music Students

Jul 2026 – Present

Product Designer & Developer

- Scoped a practice-support tool around two drop-off patterns observed across 3 years of teaching 7 beginner students: losing track of lesson material between sessions, and abandoning guitar during the early fingertip-pain phase.
- Defined a core feature set of teacher-written lesson notes, annotated chord and finger-placement diagrams, and a weekly practice view, prioritising the ability to self-troubleshoot at home without the instructor present.
- Building a responsive web prototype in Figma for usability testing with 4 current students, with iteration planned against observed practice behaviour.

Identity & Visual Storytelling — Illustration Series

Dec 2024 – Mar 2025

Visual Designer & Illustrator

- Illustrated and shipped a 20-piece digital series on identity and visual storytelling, applying composition and colour theory in Procreate to hold a consistent visual language throughout.
- Grew an audience of 100+ followers and 500+ combined views on Instagram through a sustained posting cadence, using engagement patterns to steer the direction of later pieces.

"Sandwich" — Mobile Sandwich Ordering App

Mar 2024 – Jul 2024

Product Designer

- Conducted 4 user interviews to diagnose why mobile food ordering felt slow and repetitive, converting findings into personas, journey maps, and a prioritised feature set.
- Designed and prototyped 3 iterations of wireframes and high-fidelity screens in Figma, resolving navigation and layout breakdowns surfaced in each feedback round.
- Streamlined the ordering flow across 3 rounds of usability testing, cutting decision fatigue while preserving the customisation options testers ranked as essential.

EXPERIENCE

Freelance Piano & Guitar Instructor

Mar 2023 – Present

- Built personalised lesson plans for 7 complete beginners with no prior musical training, adapting pacing and teaching method to each learner instead of following a fixed syllabus.
- Sustained multi-year engagements by anchoring lessons to what each student wanted to play, earning 2 direct referrals and growing the roster entirely by word of mouth.
- Managed scheduling, lesson planning, and parent communication while balancing national service and full-time study.

Lincstech Circuits Singapore Pte Ltd

May 2026 – Jul 2026

Product Technician

- Assembled and handled 200+ PCBs per shift across baking, prepackaging, and copper-layering processes, consistently meeting the production target set for the line.
- Enforced quality control by manually inspecting every board after each process stage, preventing defective units from progressing downstream.

Twokii

Mar 2024 – Aug 2024

Instructor & Logistics Support

- Delivered safety briefings on wildlife encounters, hiking protocols, and cycling rules to 2–3 classes of 10+ children before each excursion.
- Supervised 30+ children across 4 outdoor excursions, including 2 night cycling events and 2 hikes, with zero injuries recorded.
- Resolved on-site disruptions in weather, routing, and group composition by adapting plans in real time.

SKILLS

Design & Visual Tools: Figma, Adobe Photoshop, Procreate, Canva

UX Methods: User research, interviews, personas, journey mapping, wireframing, prototyping, usability testing

Programming: Java (OOP), Python (pandas, matplotlib), C

Productivity: Microsoft Excel, PowerPoint, Word
